POSTCARD

Dear Commissioner Henney,

As you know, the use of antibiotics in agriculture to promote growth and prevent disease in cattle & other farm animals, has contributed to the exponential rise of antibiotic-resistance bacterial infections in humans, and is therefore a grave threat to human health.

The FDA's mission is to protect human health by NOT permitting the misuse of drugs. NON-THERAPEUTIC USE OF ANTIBIOTICS IN AGRICULTURE IS CLEARLY SUCH A MISUSE, AND I URGE THE FDA TO FULFILL ITS MANDATE TO PROTECT OUR HEALTH BY BANNING HUMAN ANTIBIOTICS, AND OTHER CLOSELY RELATED ONES, IN ANIMAL FEEDS.

Thank you,

Guy Merckx
